

1.1.1 Tracking Map – Status Tab

A **Status** is a pre-defined number allocated to a user-defined situation within a mobile's journey. The user will be notified via e-mail and/or pop up messages with any status changes of the tracked vehicle.

The **Status tab** displays all details pertaining to the Statuses on your account. The Status tab has 2 other vertical tabs; **Events tab** and **List tab**.

The screenshot shows a web interface with a top navigation bar containing buttons for 'Mobiles', 'W Boxes', 'Status', 'Display', 'Find', 'History', and 'Utils'. Below this is a vertical sidebar with 'Events' and 'List' tabs. The main content area is titled 'Monitor the status e' and displays a table with the following data:
